Welcome to this month's edition of *Street Talk*, a monthly update about street and road projects in Garland. Also check for updates in the *Garland City Press*, *NextDoor* and other social media outlets.

We appreciate your feedback about information you would like to see featured in upcoming newsletters.

As construction continues to progress, here are a few reminders from the Street Department:

Keep Vehicles Away from Construction Sites:

The City of Garland Street Department will put a notice on the vehicle with a visible tag if it interferes with a construction area. The Street Department will make every effort to locate the owner to have the vehicle moved. However, if we are unable locate the owner, the vehicle will be towed at the owner's expense.

Be Aware of Street Signs:

The Street Department works year round to ensure road safety for our residents. However, during the summer we pick up the pace and cover a lot more ground! Upon the completion of your street or alley repair or reconstruction, you may still see caution tape or barricaded areas. Despite the project appearing to be complete, some areas of concrete may require additional cure time and are not able to support vehicular traffic until all barricades and other traffic control devices are removed.

Hand-Water Lawns Only:

It is vital not to use your sprinkler system if the City of Garland Street Department is overlaying, repairing or reconstructing your street. Water in the construction area will delay the progress of the overall repair. Please turn off your sprinklers for the duration of the project.

Bond Project Spotlight:

Naaman School Road Project

The City of Garland will reconstruct Naaman School Road from a two-lane roadway into a four-lane divided street stretching from Brand Road to State Highway 78 (Lavon Drive). This plan includes raising the road over Spring Creek, while creating an enclosed storm drain system and a hiking trail along the north side of the roadway. This project will alleviate road congestion by providing twice the number of travel lanes in each direction and alleviate flooding issues during significant rainfall. The Naaman School Road project is currently in the design phase and anticipated to start construction in early 2022.
